Introduction

Neuropath Behavioral Healthcare offers a hands-on **AI Automation Systems Specialist Internship** for students and early-career individuals interested in AI, automation, software development, CRM systems and emerging technologies.

Working alongside experienced team members, interns help develop, test, document and improve AI-powered and automated workflows that support quality behavioral healthcare operations.

Program Overview

> This internship is structured to:

Interns work on practical projects involving AI tools, GHL, Zoho CRM, low-code/no-code automation and basic coding under supervision. You will learn to spot repetitive processes, turn them into reliable workflows, connect systems through APIs and webhooks, and document every build so the team can rely on it. This 3–6 month on-site internship builds a real portfolio of automation work.
